

Program Information

[Conference Program](#) | [Abstracts](#) | [Keynote & Invited Talk](#) | [Social Events](#) | [Pre-Conference Events](#)

The program of the 17th I4CS will offer a great opportunity to present community aspects seen from different views, to exchange best practise, and to perform close networking.

Presentation Sessions

The main track is formed by individual presentations based on the submitted papers. A session will consist of two or three oral slide presentations dedicated to a certain topic. Each speaker will be given a 25 minute time slot for presentation plus five minutes of discussion.

Each session is moderated by a Session Chair. You can find the name of your chair in the [conference program](#). Please meet your chair in advance and provide him with sheet of paper containing your short CV and interests.

Presentations, which were provided by the authors, will be available as pdf by clicking the download icon next to the title in the abstracts section (coming soon).

Keynote and Invited Talk

On Monday our keynote speaker will be a very experienced innovator. We would like to welcome Klaus Milczewsky from Deutsche Telekom, Product Innovation.

On Wednesday an invited talks of about one hour will extend the horizon of community aspects. Expect the unexpected from a new perspective. It is about the Fixed-Mobile Convergence of the networks of the future. Our speaker Dr.Gerhard Kadel is Head of wireless technologies and networks at Deutsche Telekom.

Social Events

Do not miss them, there is no better way for networking at all. Form a very special community during the conference. There will be an early welcome reception Darmstadt downtown at Sunday night, the come together on Monday, and the conference dinner on Tuesday. For all registered participants the last two main events are included in the conference fee.
